Abstract

The speed of Internet has changed the way people receive the information. It combines the immediacy of broadcast with the in-depth coverage of newspapers making it perfect sources for news and weather information. Even with the multimedia excitement of the web, Electronic mail (email) is the most frequently used application of the Internet. Many people, who have access to the Internet at school, home and at work place use the Internet for no other purpose than to send and to receive the mail. It’s not just friends and co-workers that are receiving email. Wherever you look, the web is providing email addresses. This has made communication between the strangers easier than ever. Chatting is one of the more popular activities on the Internet- people can talk to anyone across the world. Introduction of social media networking sites has facilitated communication. These are web-sites where users can create a profile and connect that profile to others to form an explicit personal network.
